

# Making Blockchain Real for Business

## 让区块链真正为商业所用

Dr. Changrui Ren (任常锐)  
IBM Research – China

IBM Blockchain PoV

IBM Blockchain Practices

Challenges and Trends

# The value of blockchain

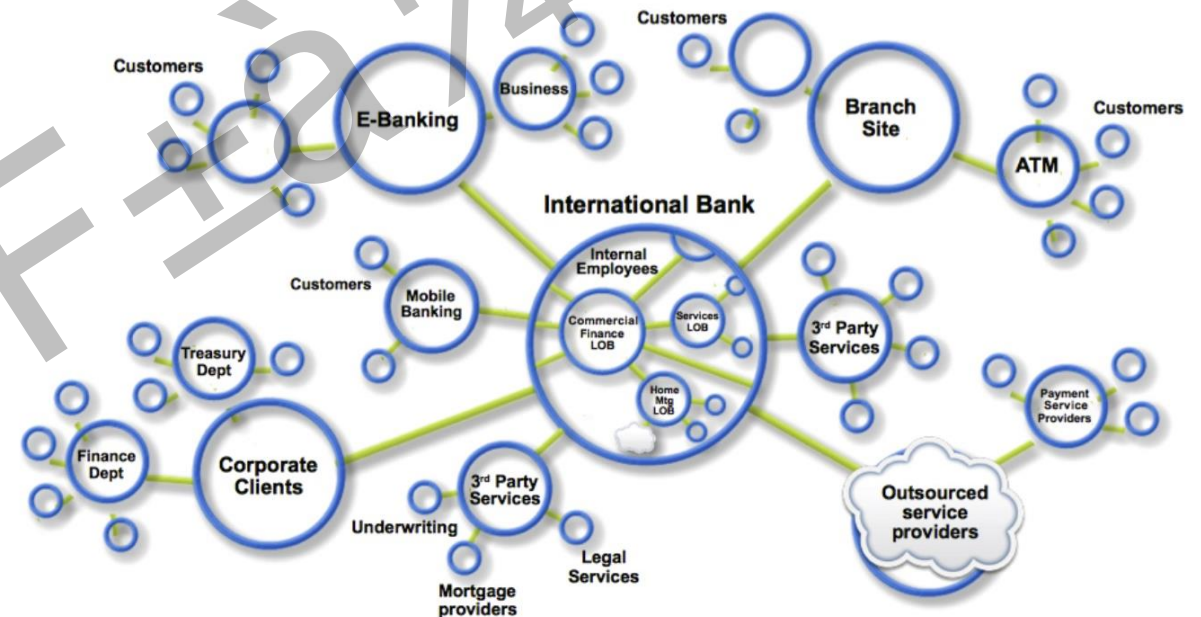

*“What the internet did for communications, blockchain will do for trusted transactions.”*

— Ginni Rometty, IBM CEO

# Business networks, wealth and markets

- Business Networks benefit from connectivity
  - Participants are customers, suppliers, banks, partners
  - Cross geography and regulatory boundary
- Wealth is generated by the flow of goods and services across business network in transactions and contracts
- Markets are central to this process:
  - Public (fruit market, car auction), or
  - Private (supply chain financing, bonds)

# Hyperledger: A Linux Foundation project

- Linux Foundation Hyperledger
  - A collaborative effort created to advance cross-industry blockchain technologies for business
  - Announced December 2015, now 200+ members (45+ in China)
  - Open source, open standards, open governance
- Hyperledger Fabric
  - An implementation of blockchain technology that is intended as a foundation for developing blockchain applications
  - Key technical features:
    - A shared ledger and smart contracts implemented as “chaincode”
    - Privacy and permission through membership services
    - Modular architecture and flexible hosting options
- V1.1 released March 2018 (V1.0 July 2017, V0.6 Sept.2016)

# IBM Blockchain Landscape

specialists

Collaborate with specialists teams from ideation all the way to production

**Ecosystem**

Tap into our diverse ecosystem to develop strategic partnerships and create your competitive advantage

**Solutions**

Solve critical industry challenges by building and joining new business networks and applications

**Platform**

Develop, govern and operate enterprise blockchain networks with speed and security

**HYPERLEDGER  
Fabric**

A founding, premier member of Hyperledger, IBM is committed to open source, standards & governance

# Experience of hundreds of engagements and multiple active networks

Trade Finance	Pre and Post Trade	Complex Risk Coverage
---------------	--------------------	-----------------------

		
---	--	---

Identity/ Know your customer (KYC)	Unlisted Securities/ Private Equity Funds	Loyalty Program
------------------------------------	---	-----------------

		
---	--	---

Medicated Health Data Exchange	Fraud/ Compliance Registry	Distributed Energy/ Carbon Credit
--------------------------------	----------------------------	-----------------------------------

		
--	--	--

Supply Chain	Food Safety	Provenance/ Traceability
--------------	-------------	--------------------------

		
---	--	---

# Trends & Challenges

## What?

- Track diamonds across supply chain from mine to retail

## How?

- Shared ledger for storing digital certification with supporting material

## Benefits

- Protect against the occurrence of fraud, theft, trafficking and black markets
- Assist in the identification and reduction of synthetic stones being labelled as authentic
- Increase speed of transparency for cross border transactions for insurance companies, banks and claimants

# Crypto anchors: linking physical and digital

World's Smallest Computer

Verifier

Edible Ink
